

**Naeemul Hassan**

Assistant Professor

Department of Computer and Information Science

University of Mississippi

+1 (817) 437 4518

nhassan@olemiss.edu

cs.olemiss.edu/~nhassan

216 Weir Hall, University, MS 38677

---

**RESEARCH INTERESTS**

My research interests encompass big data, database and data mining. Computational journalism and Natural Language Processing are my current research focus.

---

**EDUCATION**

**Ph.D. in Computer Science.** University of Texas at Arlington August 2010 – August 2016

- CGPA: 4.0 out of 4.0
- Dissertation Title: Toward Automated Fact Monitoring and Checking

**B.S. in Computer Science.** Bangladesh University of Engineering & Technology 2004 – 2009

- CGPA: 3.68 out of 4.0
- Thesis Topic: Wireless Ad hoc Network Optimization. Papers published– C11, C10

---

**PROFESSIONAL EXPERIENCE**

**Assistant Professor.** University of Mississippi August 2016 – Present

Currently, building the Data Exploration and Research (*dear.lab*) laboratory, a cross-domain facility for data-intensive research and application development.

**Research Associate.** Qatar Computing Research Institute (QCRI) March 2013 – August 2013

Analyzed the problem of community and conflict detection in friend-foe network. It has many applications in social network analysis. Developed a probabilistic algorithm to solve the problem and validated its efficacy using Twitter data and Correlates of War data.

**Network Planning & Engineering Intern.** AT&T May 2012 – August 2012

Voice call quality maintenance is a key operation for AT&T. Knowing the source (indoor/outdoor) of voice calls helps reduce troubleshooting cost. I analyzed AT&T's voice call data of three months, engineered features and developed a prediction model to determine indoor/outdoor status of a voice call. The method has been patented.

**Graduate Research Assistant.** University of Texas at Arlington August 2010 – August 2016

---

**TEACHING EXPERIENCE**

**Course Instructor.** University of Mississippi

Computational Journalism

Spring 2017

Software Design and Development

Spring 2017

Data Mining

Fall 2016

**Course Instructor.** University of Texas at Arlington

Fall 2014

Taught a full-credit Data Mining course. Average rating from students' feedback: 4.3 out of 5.0

**Graduate Teaching Assistant.** University of Texas at Arlington

Design &amp; Analysis of Algorithms

Fall 2013, 2011

Database Systems &amp; File Structures

Spring 2012, 2011, Summer 2011, Fall 2010

Advanced Topics in Software Engineering

Spring 2014

Introduction to Computers and Programming

Spring 2011

**Lecturer.** Daffodil International University, Bangladesh

Spring 2010 – Summer 2010

Courses: Numerical Methods, Compiler, Simulation & Modeling, Electrical Circuits.

### • Learning Latent Representation

**Sentence Representation O1:** Vector representation of sentences is important for many text processing tasks that involve clustering, classifying, or ranking sentences. Recently, distributed representation of sentences learned by neural models from unlabeled data has been shown to outperform the traditional bag-of-words representation. However, Most of the existing representation learning methods consider only the content of a sentence and disregard the relations among sentences in a discourse by and large. The objective of this project is to explore novel models for learning latent representations of sentences that consider the content of a sentence as well as inter-sentence relations.

### • Computational Journalism

**Automated Fact-checking C1, C2, C4, O2:** Journalists spend a lot of time fact-checking claims made by politicians. I am developing an automated live fact-checking platform named **ClaimBuster** (<http://idir.uta.edu/claimbuster>). It has a text mining component that detects factual claims which are worth checking from political discourses such as presidential debates, a social media component that monitors check-worthy tweets and a community component that helps fact-checking enthusiasts discuss and collaborate with each other. This project have received media attention from multiple news outlets, including Austin American Statesman, Poynter and New Scientist. It has also won the Knight Foundation Prototype Fund.

**Significant Fact Monitoring J1, C6, C7:** Developed an award winning system **FactWatcher**, which helps journalists identify data-backed, attention-seizing facts from ever-growing database. These facts serve as leads to news stories. Demonstration is available at <http://idir.uta.edu/factwatcher>.

### • Multi-dimensional Pareto-optimal Analysis

**Skyline Group C5, J2, C8:** We formulated the novel *Skyline Group* problem. One of its many applications is finding expert groups to complete tasks. Demonstrations on three domains (sports, question-answering, paper review) are available at <http://idir.uta.edu/crewscout>.

**Crowdsourcing Pareto-Optimal Objects Finding C3:** This is the first study on crowdsourcing Pareto-optimal object finding, which has applications in public opinion collection, group decision making, and information exploration. Departing from prior studies on crowdsourcing skyline and ranking queries, it considers the case where objects do not have explicit attributes and preference relations on objects are strict partial orders. The partial orders are derived by aggregating crowd-sourcers' responses to pairwise comparison questions. The goal is to find all Pareto-optimal objects by the fewest possible questions.

## AWARDS, FELLOWSHIPS & SCHOLARSHIPS

---

1. President's Award for Graduate Poster Presentation. ACES 2016 (out of 40 submissions)
2. Ph.D. Dissertation Fellowship. University of Texas at Arlington. Spring 2016
3. Graduate Fellowship. University of Texas at Arlington. Fall 2015, Spring 2016
4. Outstanding Teaching Assistant Award. University of Texas at Arlington. Spring 2015
5. CIKM 2015 Travel Grant
6. Computation+Journalism Symposium 2015 Travel Grant
7. Excellent Demonstration Award. VLDB 2014 (out of 115 submissions)
8. STEM Fellowship. University of Texas at Arlington. Fall 2010 – present
9. Dean's List Award. Bangladesh University of Engineering & Technology (BUET). 2007 – 2009
10. Computer Science & Engineering Academic Merit Scholarship. BUET. 2007 – 2009
11. University Engineering Scholarship. BUET. 2006 – 2009
